Subject for letter goes here

Dear Sir/Madam,

This is an example Org document for generating a letter using the `scrlttr2` class in the LaTeX KOMA-Script package via Org-mode's exporter, adapted from the example here.

Install the `koma-script` package using the system TeX package manager. Also download `ox-koma-letter.el` from here and make sure its directory is in Emac's `load-path` variable.

To compile this document, use Org-mode's exporter via `C-c C-e` and selecting *Export with KOMA-Scrlttr2* and the desired filetype.

For more information on using `ox-koma-letter`, see its tutorial. For more information on using the `scrlttr2` LaTeX class, see its documentation here.

Yours faithfully,

Sender
